SUMMARY

Python Developer fresher (B.Tech CSE 2026, 8.05 CGPA) skilled in **Python, Django, Django REST Framework, FastAPI, React.js, SQL, HTML, CSS and JavaScript**. Built **Placera**, a full-stack Django placement management and analytics platform with authentication, skill matching, rejection analysis and resume uploads, and a responsive React web page during a web development internship. Completing Python Full Stack training at QSpiders. Seeking a Python Developer / Software Associate role to build clean, maintainable web applications.

SKILLS

Languages: Python, JavaScript (ES6), SQL, HTML5, CSS3
Backend: Django, Django REST Framework, FastAPI (training), Django ORM, MVT Architecture, REST concepts, Authentication, Forms and Validation
Frontend: React.js, Responsive Design, HTML5, CSS3, JavaScript
Databases: SQL, SQLite
Tools: Git, GitHub, VS Code
Concepts: OOP, CRUD, File Handling, Data Analytics (rule-based), Debugging

PROJECTS

Placera – Smart Campus Placement & Student Improvement Platform github.com/sushreankita/PLACERA
Tech: Python, Django, Django REST Framework, SQLite, HTML, CSS, JavaScript

- Built a full-stack **Django** placement management platform (MVT architecture, **Django ORM**, SQLite) to track student applications and analyze placement performance.
- Implemented **skill-matching** logic that calculates match percentage and identifies missing skills for a selected company and job role, with automatic retrieval of required skills after job vacancy validation.
- Developed **placement analytics** tracking applications, interviews, offers, rejections, conversion rates and application stages.
- Implemented **rejection and weakness analysis** to identify recurring issues across aptitude, coding, technical, HR, resume and eligibility stages, and added rule-based personalized improvement suggestions from skill gaps and rejection patterns.
- Implemented session-based **authentication**, student profile management, **resume upload/view** using Django file handling, and **CSV import** of application data with CRUD operations.

EXPERIENCE

Web Development Intern | YHills (Remote) June 2024 – August 2024

- Built a responsive Pizza Store web page using **React**, HTML5, CSS3 and JavaScript with reusable components that adapt to different screen sizes.
- Structured navigation, page content and interactions as React components; tested page flow in the browser.
- Used **Git and GitHub** for version control and to publish project code.

TRAINING

Python Full Stack Development | QSpiders, Hyderabad 2026 (ongoing)

- Learning Python, FastAPI, Django, SQL, HTML, CSS and JavaScript; building full-stack web applications with models, views, templates and the Django ORM.

EDUCATION

B.Tech, Computer Science & Engineering 2026
Synergy Institute of Engineering and Technology, Dhenkanal
CGPA: 8.05 | Coursework: Python Programming, SQL & Database Systems, Web Development, Software Engineering
12th: 76.33% (2022) | 10th: 77.33% (2020)

CERTIFICATIONS

- Web Development Internship Certificate, YHills, 2024
- Python Full Stack Development, QSpiders (in progress, expected 2026)
